

NAPOLEON

9700 SERIES GAS FURNACES

9700 SERIES GAS FURNACES
napoleon.com

THINK DIFFERENT. THINK NAPOLEON.

Napoleon's Ultimate 9700 Series is the most stylish, advanced furnace in the industry and will meet all your heating needs.

The two-stage system creates a consistent, comfortable temperature throughout your home. The furnace will operate on the first, low fire stage for greater efficiency and comfort for most of the heating season. On colder days, the furnace automatically switches to the high fire, second stage to produce additional heat for your home. This effective two-stage system is like having two furnaces in one. Napoleon's superior engineering and design guarantees reliable and efficient heat for years to come.

With the Ultimate 9700 Series furnace, you'll forget it's winter.

That's Napoleon.

Conventional Heat Exchanger

Hot air radiating 700°

Vortex™ turbulator inside the heat exchanger increases efficiency by disrupting the natural airflow which extracts the maximum heat from the flue gases.

Patented Vortex™ Technology Heat Exchanger

Hot air radiating 800°

Napoleon's heat exchangers are modular and removable to ensure easy servicing and cleaning.

IT LOOKS DIFFERENT BECAUSE IT *IS* DIFFERENT.

In an otherwise stagnant field, only one brand of furnace is bringing innovation to the HVAC world. Napoleon's Ultimate 9700 Series looks different because it is different. The revolutionary Vortex turbulator™ increases heating efficiency, the ultra violet light purifies air and the SureView burner window shows the flames in operation as the furnace whispers quiet. Don't get boxed in by outdated thinking.

SUREVIEW BURNER SYSTEM

Patented SureView burner system window allows a unique view of the flames in operation, a first in the industry.

CLEAN AIR TECHNOLOGY

HOMESHIELD ULTRA-VIOLET AIR PURIFICATION

Napoleon's Ultimate 9700 Series includes a HomeShield UV lamp inside the furnace cabinet. This allows the air passing through the furnace to be purified with HomeShield's UV technology before it circulates through your home.

HomeShield uses chemical free, ultra-violet light to intercept airborne pathogens like allergens and dust mites. It halts bacterial growth from recurring and helps to maintain healthy air in your home.

ENERGY SAVINGS & COMFORT

ANNUAL FUEL UTILIZATION EFFICIENCY (AFUE)

AFUE works much like the miles-per-gallon rating on a car - the higher the rating, the lower the fuel costs. The Annual Fuel Utilization Efficiency (AFUE) measures the amount of comfort for every dollar spent. If a furnace is 25 years old or more, it could have a rating as low as 55% to 65% AFUE, compared to a new Napoleon Ultimate 9700 Series' 97%.

Cost Comparison of Motors Over Five Years

Cost Comparison of Operating Your Furnace Over Five Years

**97% + AFUE MEANS
SIGNIFICANTLY
LOWER FUEL BILLS**

MODULAR INDIVIDUAL COMPONENTS

Napoleon's innovative modular design allows for easy handling, and cleaning. With a removable heat exchanger and blower compartment, servicing a Napoleon furnace is a whole new experience.

FUTURE READY WIFI CAPABLE

Napoleon's Ultimate 9700 Series is compatible with smart thermostat technology. Easily paired with a wide variety of thermostats and control boards, the Ultimate 9700 is compatible with your home.

COMFORT CONTROLS FROM
WHEREVER YOU ARE

SPOTLIGHTS LED CABINET LIGHTS

Napoleon's Ultimate 9700 Series includes LED lights inside the furnace cabinet which will automatically turn on when the front panels are removed.

INTERIOR LIGHTING FOR
BETTER VISIBILITY

WHISPER QUIET SOUND PROOF CABINET

Napoleon's Whisper Quiet™ EnerSave Plus motor will 'soft start' & 'soft stop' to gradually change speed, reducing the rush of noise created by conventional motors. Napoleon's Ultimate 9700 Series is built with a fully insulated cabinet to ensure your furnace is no louder than a whisper.

VARIABLE SPEED TECHNOLOGY

Napoleon's EnerSave Plus motor uses variable speed technology, creating a two-stage furnace. A two-stage furnace runs longer at lower capacity - 60% versus 100%. The blower runs at 60% on first stage for most of the year, reduces electrical consumption by up to 80% over conventional blower motors saving you fuel and money.

OUR DIFFERENCE IS IN THE DETAILS

7 WAYS TO COUNT ON THE BEST

1 Commercial Grade Stainless Steel Tubular Triple-Pass Heat Exchanger

- Controlled wrinkle-bend design of heat exchanger creates tubes with consistent thickness and no weak areas
- Highly-efficient triple pass tubular design has a large surface area to maximize heat transfer
- Vortex Turbulator
- Modular components for easy servicing

2 Stainless Steel Heat Recovery Coil

- Extracts the remaining heat from the flue gases once they exit the triple-pass heat exchanger
- Increases efficiency by evenly distributing the remaining heat to the coil's large fins

3 Aluminized Multi-Port in Shot Burners

- Corrosion resistant burners that perfectly shape the flame cone for maximum flame efficiency

4 Two-Stage Gas Valve

- Ensures comfort levels in the home are maintained while saving energy

5 Self Diagnostic Integrated Furnace Control (IFC)

- Contains LED service indicator lights to ensure quick and accurate service calls
- Built in LED lights in upper and lower compartments automatically turn on when bottom door is opened for servicing
- Interfaces with additional home comfort products using simple plug-in connections
- Mounted between the blower rails for easy accessibility
- Ultra Violet Light Air Purifier to improve indoor air quality

6 Electronically Commutated Motor (ECM)

- Reduces electrical consumption by up to 80% over conventional blower motors
- Soft-start soft-stop operation reduces noise levels by gradually increasing motor RPM's at start-up and ramping down slowly on shut down
- On continuous fan speed, the ECM motor consumes 60-80 watts compared to 400 watts for a conventional motor, reducing electrical consumption up to 80%
- WHISPER QUIET™ operation

7 Durable Sound Reducing Insulated Cabinet

- WHISPER QUIET™ operation with SILENTCORE™ technology, the only four-sided insulated cabinet
